Digital Marketing: SEO Fundamentals, On-Page SEO, Keyword Research, Blog & Content Writing, Organic Marketing

Core Concepts: Human-Computer Interaction (HCI), UI/UX Prototyping, Data Structures, OOP, DBMS, App development, AI

PROJECTS

AI Quiz Generator | React.js, FastAPI & Gemini API

- Built a full-stack web app that generates custom quizzes from user-provided topics using the Gemini API.
- Developed a React.js frontend for quiz creation and taking, backed by a Python FastAPI service handling prompt logic and response parsing.

AI Lead Qualification & Email Automation | n8n & Gemini API

- Built an automated workflow connecting Airtable, Google Gemini API, and Gmail to qualify inbound leads and generate customized email responses.

Pet Medication Tracker | Python

- Built a desktop GUI-based application featuring full CRUD (Create, Read, Update, Delete) functionality to help users manage pet health schedules.

Music Playlist Manager | C++ with Doubly Linked List

- Developed a terminal-based music playlist simulator.
- Supported playlist manipulation: add, delete, search, and shuffle songs using a doubly linked list.

ToDo App | React Native

- Built a task management app with all the basic React Native components, used navigation and local state management.

Three.js + Vercel

- Worked on 3D graphics in Three.js and deployed through Vercel for HCI-CG course.

EXPERIENCE

Social Media Team — AWS Cloud Club - University of Karachi

- Drafted promotional captions, announcements, and written copy for events and technical sessions.
- Created digital graphics and banners using Canva to support club social media presence.
